## MADE TO WITHSTAND CANADIAN WEATHER

- 🍁 Made with 100% Canadian Materials!
- 🍁 Constructed from 13-14 gauge galvanized steel, clear coated for an anti-rub finish - frame diameter will vary with building size (1.315" - 2.375").
- 🍁 Innovative round top allows snow to slide off much easier than the conventional house style roof.
- 🍁 Arches have welded cross braces and are made in one piece for exceptional wind and snow load strength.
- 🍁 14 oz, 23 mil, rip stop polyethylene cover with industrial welded seams; by far the heaviest in the fabric shelter industry!
- 🍁 Fabric has a 15 year UV treatment and comes with a 10 year UV warranty.
- 🍁 Standard 7' high sliding door but can be made up to 14' high upon request.
- 🍁 Duck bill anchor package and wind straps included with every unit.
- 🍁 Roll up doors come standard with our 2 car garage, RV garage, and heavy truck garage. An effortless hand crank provides quick and easy access. An innovative design allows the door to stay open without the hassle of tie straps. Just simply roll it up and walk away.
